**Fostering Agreement  
For  
Kingston Humane Society  
Animals**

Due to space limitations, and lack of isolated areas, animals that are exposed to the viruses commonly known in shelters and kennels, have a lesser chance of survival. Because of the risk of exposing these viruses to other healthy animals, we find that placing these animals in foster homes helps the animal recuperate easier and quicker. Orphaned puppies/kittens and the offspring of pregnant or nursing animals have a greater survival rate in a foster home environment where they can be properly socialized.

During the fostering period food, liter, all medications and supplies will be provided by the shelter as needed. When you receive any items from the shelter please ensure that they are returned as soon as possible, so there are no shortages later on. Veterinary services will be available at the shelter during regular office hours. If your foster animal needs emergency veterinary care after hours, please call our on-call staff before seeing an outside veterinarian. **You can reach the on-call staff by calling 613-546-1291 and listening for the emergency prompt.**

If after these animals have finished their initial treatment you find that the animal is still in need of medical attention, please call the shelter during operational hours. As treatments and all medications will be provided at no cost by the shelter, please use this service as the Kingston Humane Society will not refund monies for any outside purchases.

The fostering period which the animal needs will be determined by Kingston Humane Society's R.V.T.'s, Veterinarian and the Foster Coordinator. The animal will stay in care until recalled by the Foster Coordinator.

**If you have any questions please contact the Foster Coordinator at 613-546-1291, email [foster@kingstonhumanesociety.ca](mailto:foster@kingstonhumanesociety.ca) or stop by the shelter Monday to Friday 11am-6pm.**

**Fostering Agreement**

I \_\_\_\_\_, agree to foster the animal(s) in my care for the duration of the full healing process. I will return the animal to the shelter when all the medications and treatments are finished or when requested by the Foster Coordinator at any time during the foster period. I also agree to the above fostering agreement.
